

MERINO Wool

保温性に優れ、肌に優しい Retains Warmth and Superior Comfort

ウールは発熱繊維として優れた発熱量を誇ると同時に、繊維表面の組織が熱を包み込み、暖かさを持続させます。また、ウールの中でも特に繊維が細かいものを厳選し、チクチク感を抑えた素肌に優しい肌触りを実現しています。

Wool is an exceptional fiber that generates and maintains heat due to its unique outer structure. Furthermore, by carefully selecting extremely fine wool fibers, garments made from Merino Wool feel comfortably soft next to your skin, not itchy.

天然の抗菌防臭性 Natural Antibacterial Properties

天然素材特有の抗菌性能により、高い防臭機能を発揮します。

It is said that wool fabrics are naturally odor resistant and Super Merino Wool is no different. We have even integrated a treated polyester fiber to obtain better odor resistant properties.

ウォッシュابل・イージーケア Simple to Care For

ご家庭でも簡単に洗濯していただけます。

All of Montbell's Merino Wool garments can be washed in the home. (Please use mild detergent, machine wash cold on the gentle cycle, and lay flat to dry.)

静電気が起きにくい Static Electricity Resistant

縫い糸に自然放電するカーボン繊維を使用。帯電しにくいウールの特性に加え、より静電気が起こりにくくなっています。

By introducing a small number of electron deductive carbon fibers into the thread we are able to produce a fabric that limits the positive charges placed on atoms during activity, thus reducing the amount of static electric build up.
